

Project Demonstration & Publishing Guide

This guide provides instructions on how to publish the dashboard to Tableau Public and demonstrate it via the Flask web integration.

1. How to Save and Publish the Dashboard to Tableau Public

Follow these exact steps within Tableau Desktop to generate your embed codes:

1. **Publish to Public:** Click on **"File"** in the top-left corner of the Tableau window.
2. Select the **"Save to Tableau Public As..."** option. This will prompt a sign-in window.
3. **Sign In:** Enter your Tableau Public credentials (Email and Password) and click "Sign In".
4. **Enable Settings:** After signing in, the workbook will be published and displayed in your browser. Click on the **"Settings"** (gear icon) on the top right. Scroll down and ensure **"Show workbook sheets as tabs"** is enabled so all your dashboard and story sheets are visible.
5. **Generate Embed Code:** Click the **"Share"** icon (typically in the top right or bottom right of the viz). A window titled "Embed Code" will appear.
6. **Copy Code:** Click **"Copy Embed Code"** (the `<script>` snippet).
7. **Paste to Web App:** Open `5. Project Development Phase/templates/index.html` in a code editor and paste the copied embed code into the designated `[Paste Tableau Public Dashboard Embed Code Here]` placeholder.
8. Repeat steps 5-7 for each of the Story Scenes.

2. Setup the Web Environment

1. Open a terminal and navigate to the `5. Project Development Phase` folder.
2. Install the required dependencies:

```
pip install -r requirements.txt
```

3. Run the Flask App

1. Run the application:

```
python app.py
```

1. The server will start on `http://127.0.0.1:5000`.

4. Viewing the Dashboard

1. Open a web browser.
2. Navigate to `http://127.0.0.1:5000`.
3. The page will display the "SALES" Bootstrap template. Scroll down to see the embedded Tableau Public Dashboard and Stories.

5. Demonstration Talking Points

- **Scene 1:** Point out the "Avg Sales Volume vs Product Category" chart. Emphasize that *Clothing has the highest Average sales volume*.
- **Scene 2:** Show the "Foot Traffic vs Product Position" chart. Highlight that *Product position at the Front of store has high sales volume and high foot traffic*.
- **Scene 3:** Conclude that *The Product Category clothing at the front of the store has the highest avg sales volume*.
- **Filters:** Demonstrate the interactive filters, showing how the entire dashboard recalculates live.
