

Project Planning Template

Project Scope

- **In-scope:**
 - Importing and cleaning the `Product Positioning.csv` dataset.
 - Creating 8 specific visualizations utilizing key Calculation Fields (Price, Competitor Price, Sales Volume).
 - Building an interactive dashboard with utilization of filters.
 - Creating a 3-scene Tableau Storyboard.
 - Publishing the workbook to Tableau Public.
 - Building a Flask web application to embed the Dashboard and Story.

Milestones & Timeline

Milestone	Description	Expected Completion Time
M1: Data Readiness	Collect the dataset from Kaggle and connect to Tableau (validate columns & types).	2.5 Hours
M2: Data Preparation	Prepare the data for visualization (filtering, structuring, calculated fields).	5 Hours
M3: Visualizations & Filters	Create the 8 individual charts and configure dynamic utilization of filters.	4 Hours
M4: Dashboard & Story	Assemble the responsive dashboard and the 3-scene storyboard.	4 Hours
M5: Publishing	Save and publish the workbook to Tableau Public to generate embed links.	1 Hour 40 Mins
M6: Web Integration	Develop the Flask UI, integrate HTML embed codes, and test web responsiveness.	5 Hours

Resource Allocation

- **Mohammad Farheen:** Data Analyst / Tableau Developer / Web Integrator
 - *Responsibilities:* Dataset collection, building all visualizations, publishing to Tableau Public, and developing the Flask embed UI.
