

User Acceptance Testing (UAT) Report

Project Name: Strategic Product Placement Analysis

Date of Testing: [Current Date]

1. Executive Summary

The UAT phase for the Tableau Data Visualization project has been successfully completed. The embedded Flask application and all interactive dashboard features were tested against the initial business requirements. The solution was deemed highly functional, responsive, and ready for deployment.

2. Testing Participants

- **Data Analyst:** Mohammad Farheen
- **Simulated Persona:** Retail Store Manager

3. Testing Scope

- Validation of the 8 core Tableau visualizations.
- Interaction testing of the global dashboard filters.
- Review of the 3-scene Storyboard narrative.
- UI/UX verification of the embedded Flask web portal.

4. Defect Log

No critical defects were identified during testing.

- **Minor Observation:** Initial load of the Tableau Public iframe can take up to 3 seconds depending on internet speed.
- **Resolution:** Added a loading placeholder text in the Flask HTML template to improve perceived performance.

5. Sign-off

The stakeholders confirm that the Strategic Product Placement Analysis dashboard meets the objectives of identifying optimal product positioning to maximize sales volume.

Status: APPROVED FOR SUBMISSION.
